Fuzzy Wuzzy™ Audrey Banyan Fig

Ficus benghalensis 'Audrey'

Height: 8 feet

Spread: 4 feet

Sunlight: ○ ◐

Hardiness Zone: 10a

Other Names: Strangler Fig

Group/Class: Leafjoy Houseplants

Description:

A fast growing, attractive indoor selection perfect for medium to high light; velvety textured, oval dark green leaves with cream veins create a lovely, eye catching accent; provide source of humidity in drier environments; best placed near an east window

Features & Attributes

Fuzzy Wuzzy Audrey Banyan Fig's attractive large glossy oval leaves remain dark green in color with distinctive creamy white veins throughout the year on a plant with an upright spreading habit of growth.

This is a multi-stemmed evergreen houseplant with an upright spreading habit of growth. This plant should not require much pruning, except when necessary to keep it looking its best.

Planting & Growing

When grown indoors, Fuzzy Wuzzy Audrey Banyan Fig can be expected to grow to be about 8 feet tall at maturity, with a spread of 4 feet. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It will benefit from a regular feeding with a general-purpose fertilizer with every second or third watering. It is not particular as to soil type or pH; an average potting soil should work just fine. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
